◆ Features

1ms Fast Response Time

Fast 1ms (GTG) screen response displays moving images without blurring.

Low Blue Light

Reduce harmful blue light emissions with AOC's Low-Blue Technology.

Low Blue Light on ◀ ▶ Low Blue Light off

Flicker Free Technology

Most LED monitors use PWM (pulse width modulation) to control brightness; the pulsing creates flicker that may cause discomfort, headaches and eye strain, especially in low-light environments. Flicker Free technology uses a smooth DC (direct current) backlight system.

Game Mode

Game Colour

With AOC Game Colour, adjust colour saturation and grey level with 20 levels of detail for a better game experience.

AOC Shadow Control

AOC Shadow Control enables fast adjustment of the in-game image to improve areas of the screen that are too dark or washed out, without affecting the rest of the screen.

● If picture is too dark to see the details clearly, adjust the level up to have a better view of the dark area.

● If picture is too bright and wash out, adjust the level down to provide dark definition.
