ZKBio Zlink

Cloud-based Smart IoT Platform
for Small and Medium-Sized Businesses (SMBs)

Productivity Unleashed
Workplace Connected
Cloud-Powered Modern Workplace with Accelerated Solutions

What is ZKBio Zlink?

ZKTeco has developed the ZKBio Zlink, which uses Minerva IoT platform. It improves operational efficiency and connectivity, to meet the growing demand for digital transformation and cloud solutions.

As a cloud-based IoT platform, ZKBio Zlink is designed for small and medium-sized businesses (SMBs). ZKBio Zlink offers a comprehensive solution that enhances efficiency and simplifies operations by integrating access control, time and attendance, and an approval center into one unified platform. Furthermore, ZKBio Zlink is supported by a high-end, secure Amazon Web Services (AWS) cloud infrastructure and can be scaled up and down easily. It eliminates the need for substantial upfront IT investments, making it easy for SMBs to use.

ZKBio Zlink saves your time and effort, a smart solutions make your workplace more productive.

Common Challenges of SMB

| Lack of IT Support | Uncertainty of Future Expansion | Efficient Security Needs | Multi-site Organizations Challenges | Limited Budget |

Core Benefits of Using ZKBio Zlink

Cloud-based Deployment
Remote access from anywhere with an internet connection

Automatic Upgrade & Maintenance
No hassle for the manual maintenance and updates

Lightweight
Reduce IT expenditure with our installation-free platform

All-in-one Application Platform
Offer a comprehensive suite of applications for diverse business scenarios

High Scalability
Scale up the application along with your business

powered by aws

Accessible via Web Portal & Mobile App

Enjoy seamless access to our platform through both web portals and mobile apps, ensuring that you can manage your operations from anywhere, at any time.

Convenient Organization Management

Multi-Site Management

Scale your operations across geographical areas, manage multiple sites and zones allowing centralized administration of distributed business operations without added complexity.

Multi-level Department Structure

Organize your departments hierarchically to streamline workflows and improve productivity.

Unified Credentials Management

Simplify user management with centralized credentials, reducing administrative burden and boosting security.

Smooth Device Configuration & Management

Visual & Step-by-Step Configuration

Set up and manage devices with our intuitive guided processes, making technical setup straightforward and accessible.
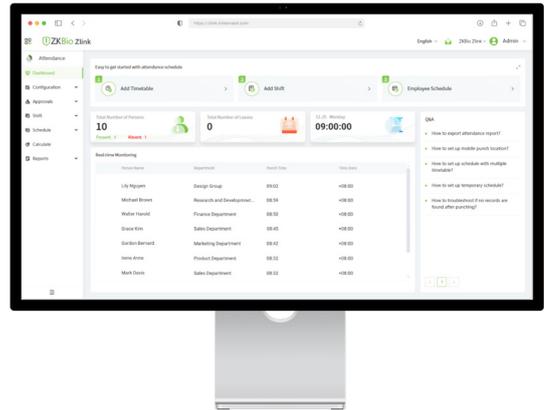

Reliable Firmware OTA Updates

Ensure your devices stay up to date with online firmware updates, minimizing downtime and maintenance efforts.

Time & Attendance Application

Intuitive Visual Dashboard

Kickstart your management with a quick guide and effortlessly monitor real-time attendance, key statistics, and access FAQs through our user-friendly dashboard, helping you to streamline your daily administrative tasks.
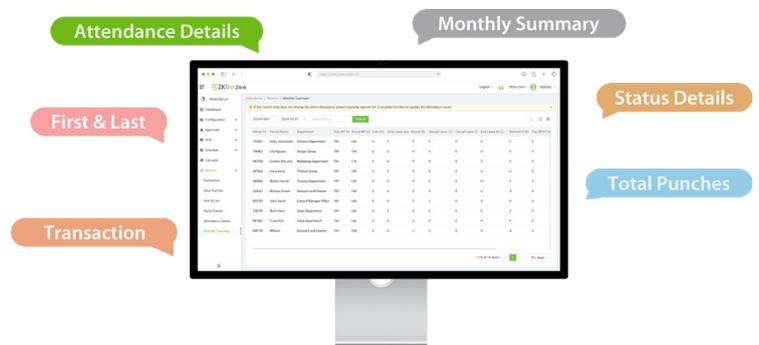

Versatile Shift & Schedule Management

ZKBio Zlink offers a comprehensive suite of flexible shift settings tailored to various industry needs, including fixed, flexible and rotating shifts, ensuring your time management is always aligned with your business rhythms.

Practical Multiple Attendance Reports

Offer a variety of attendance reports satisfying all your time & attendance management needs, providing the insights you need to make informed decisions.
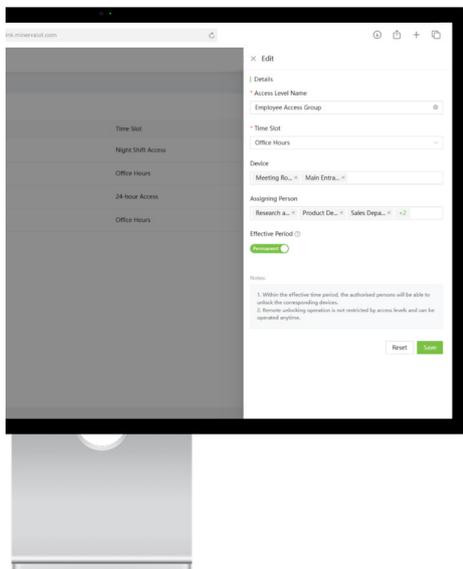

Mobile Punch & Attendance Calendar for Employees

Empower your workforce with our mobile app, allowing for easy clock-in/clock-out, attendance record checks, and the ability to apply for leave, missed punches, and overtime directly from their devices. Managers and admins can swiftly approve these requests, ensuring a seamless workflow.

Access Control Application

One-Click Remote Unlocking

Mobile access provides a modern, reliable, and seamless access control experience for offices. Unlock doors from anywhere.

Add Device → Add Specific Time Slot → Assign Access Level

Simplified Access Level Settings

Streamline access permissions by quickly adding devices, defining time slots, and assigning access levels. Ensure that only authorized persons gain entry with our precise and flexible rules settings.
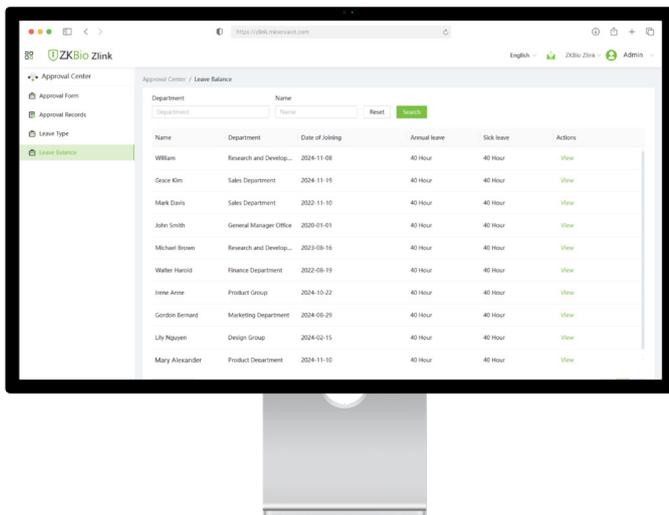

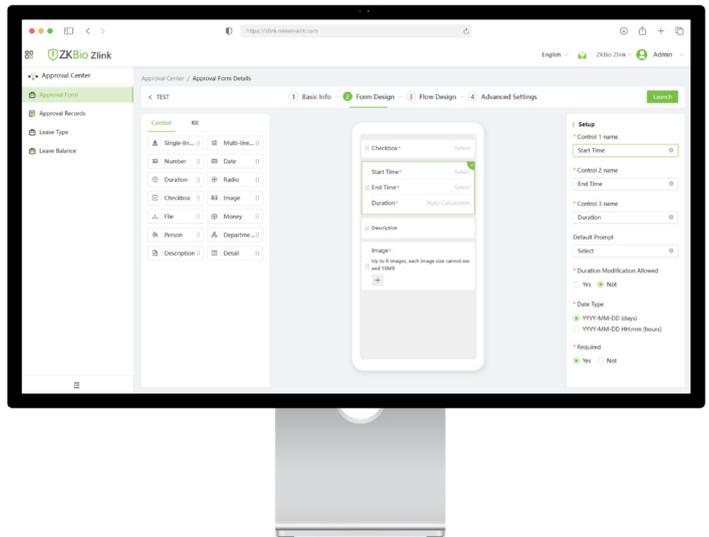

Seamless Access-Attendance Integration

Effortlessly synchronize access records with our attendance application, offering a cost-effective solution that covering basic attendance & security management.

Approval Center Application

Customized Form Template & Workflow Design

Tailor approval forms and workflows that are perfectly aligned with your unique business requirements, offering flexibility and efficiency in your approval processes.

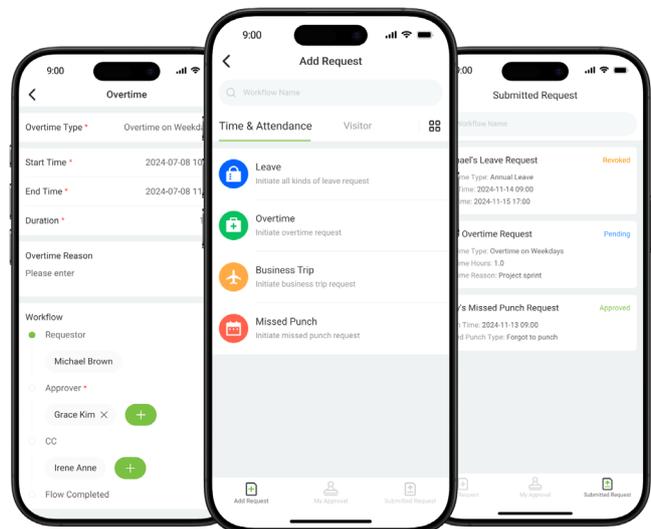

Advanced Leave Management

Establish comprehensive leave policies and manage employee balances with ease, ensuring that your organization's time-off management is both robust and straightforward.

Mobile Approval Requests

Simplify the submission of approval requests with our mobile app, allowing you to initiate and track approvals directly from your device, and making the entire process more agile and convenient.

Typical Applicable Scenarios

Multi-branch Offices

Chain Stores

Supported Products

| SenseFace 2A | SenseFace 3 Series | SenseFace 4 Series | SenseFace 7 Series | D3 |
